

# Pebblebed Hub Core SEND Provision Map 2021/22

There are four areas of need:

- 1) **Communication & Interaction**; 2) **Cognition & Learning**; 3) **Social, Mental & Emotional Health**; 4) **Physical & Sensory**.

This Provision map is used alongside the Devon Graduated Response to SEND support.

There are three levels of provision for each area of need:

**Universal provision** - Pupils operate broadly within the expected range of abilities for their age but their progress/development may occur at a somewhat slower pace than that of other pupils. The pupils remain part of the mainstream teaching timetable for all activities. Individual goals for improvement are identified and the quality of teaching and learning is monitored to ensure its appropriate to pupils' needs

**Targeted provision** – Pupil progress with learning and development is at a very slow rate and additional support is needed to improve this. Pupils may be attaining at a level significantly below age-related expectations and there may be evidence of an increasing gap between them and their peers. Evidence based Interventions (whether group or individual) have been identified and put in place on the basis of the identified need. Evidence of the impact of the intervention is recorded, to inform decisions about whether that intervention remains appropriate.

**Specialist provision** - Pupils have significant and persistent learning difficulties despite access to appropriate learning opportunities and support. Provision required to meet the pupil's needs cannot reasonably be provided from within the delegated resources normally available to mainstream schools. Pupils may have life-long learning difficulties or disabilities, across several areas of development, and will require more specialist intervention.

## **SEND Provision for Communication & Interaction**

Three strands: Social Communication; Language; Speech.
